Iowa KL @UNT

Iowa KL aff vs. sms ww
Petit, round 1

Plan, the United States federal government should establish an energy policy requiring a substantial reduction in total nongovernmental consumption of fossil fuels in the us... This energy policy should implement a phased program requiring a one-for-all replacement of electric power generating capacity from fossil fuel sources to electric power generating capacity from solar power satellites by 2030. This plan guarantees that the fossil fuel electrical power generating capacity described above will not be used on 2050.

1AC OUTLINE

No SPS now, **Courtner 2004**, wired.com/news/Technology/0,1282.,63913,00.html?TW=WN_story_Top5

Adv. 1 – warming now, **Sierra Club 2003**, Sierraclub.org/globalwarming

Humans cause it- **Henderson 2004**- Timesnewspaper LTD. “powerful evidence....human-induced”

Will overwhelm adaptation, **Bailie 2002**, worldwildlife.org “under the stresses....climate stability”

Causes Ice Age

Stipp 2004, Fortune Magazine, “a total shutdown...at America....define human life”

Hurts biodiversity

Guruswamy, 1992, Integrated pollution control, “global warming could....economic resources

CO2 is bad

Raeburn 1995, “The last harvest”, “Fakgri A. Bazzaz.....certain to change”

Warming is fast

Gelpspan 1995, Boiling Point, p. 58-59

SPS S warming

Nansen 1995, Sun Power, “The possibilities offuture of”

SPS saves billions

Heinberg 2003, The Parties Over, p.197

SPS solves Ag

Nansen again

Adv. 2 – Space

SPS key to space

Mankin 2000, statement before house, “The [65RI]...”and operations.”

No Space w/o SPS

Gortner again

Space key to life

Sowers, 2004, online, “what kinds of future”...”just bad luck”

Solvency

Tech now, aviation and space technology 2000, "The situation....system complexity"

Its safe, Electrical power research institute 2000, "when solar....or malfunction

US is key, aviation and space technology again

SPS Phase in key, mankin again

Causes investment culture, **Sheer 2002**, The Solar Economy, p.146-148
